

The future happens IRL.

An interactive festival programme for a global Web3 community. Designed and built with Scroll Craft.

THE IDEA

Make the people behind Web3 the reason to come. Documentary imagery, bold type and a physical passport give the event a human identity.

THE EXPERIENCE

Discover the event, collect your interests, meet past speakers and leave with a personal Carnival Passport.

THE DELIVERABLE

A working responsive website plus this presentation of the complete visitor journey.

A journey with somewhere to go.

The structure answers the visitor’s questions, then gives them a useful next step.

ARRIVE

What is it?

Festival masthead, original brand marks and immediate invitation.

UNDERSTAND

What is happening next?

Next-edition status, organiser contact and source-attributed community figures.

DISCOVER

What is here for me?

Seven original event tracks. Select interests and build a personal passport.

TRUST

Who is in the room?

Searchable historical speakers, profiles, event editions and ecosystem partners.

BELONG

Where do I fit?

Builder, founder, investor and explorer routes; speaker, media and volunteer enquiries.

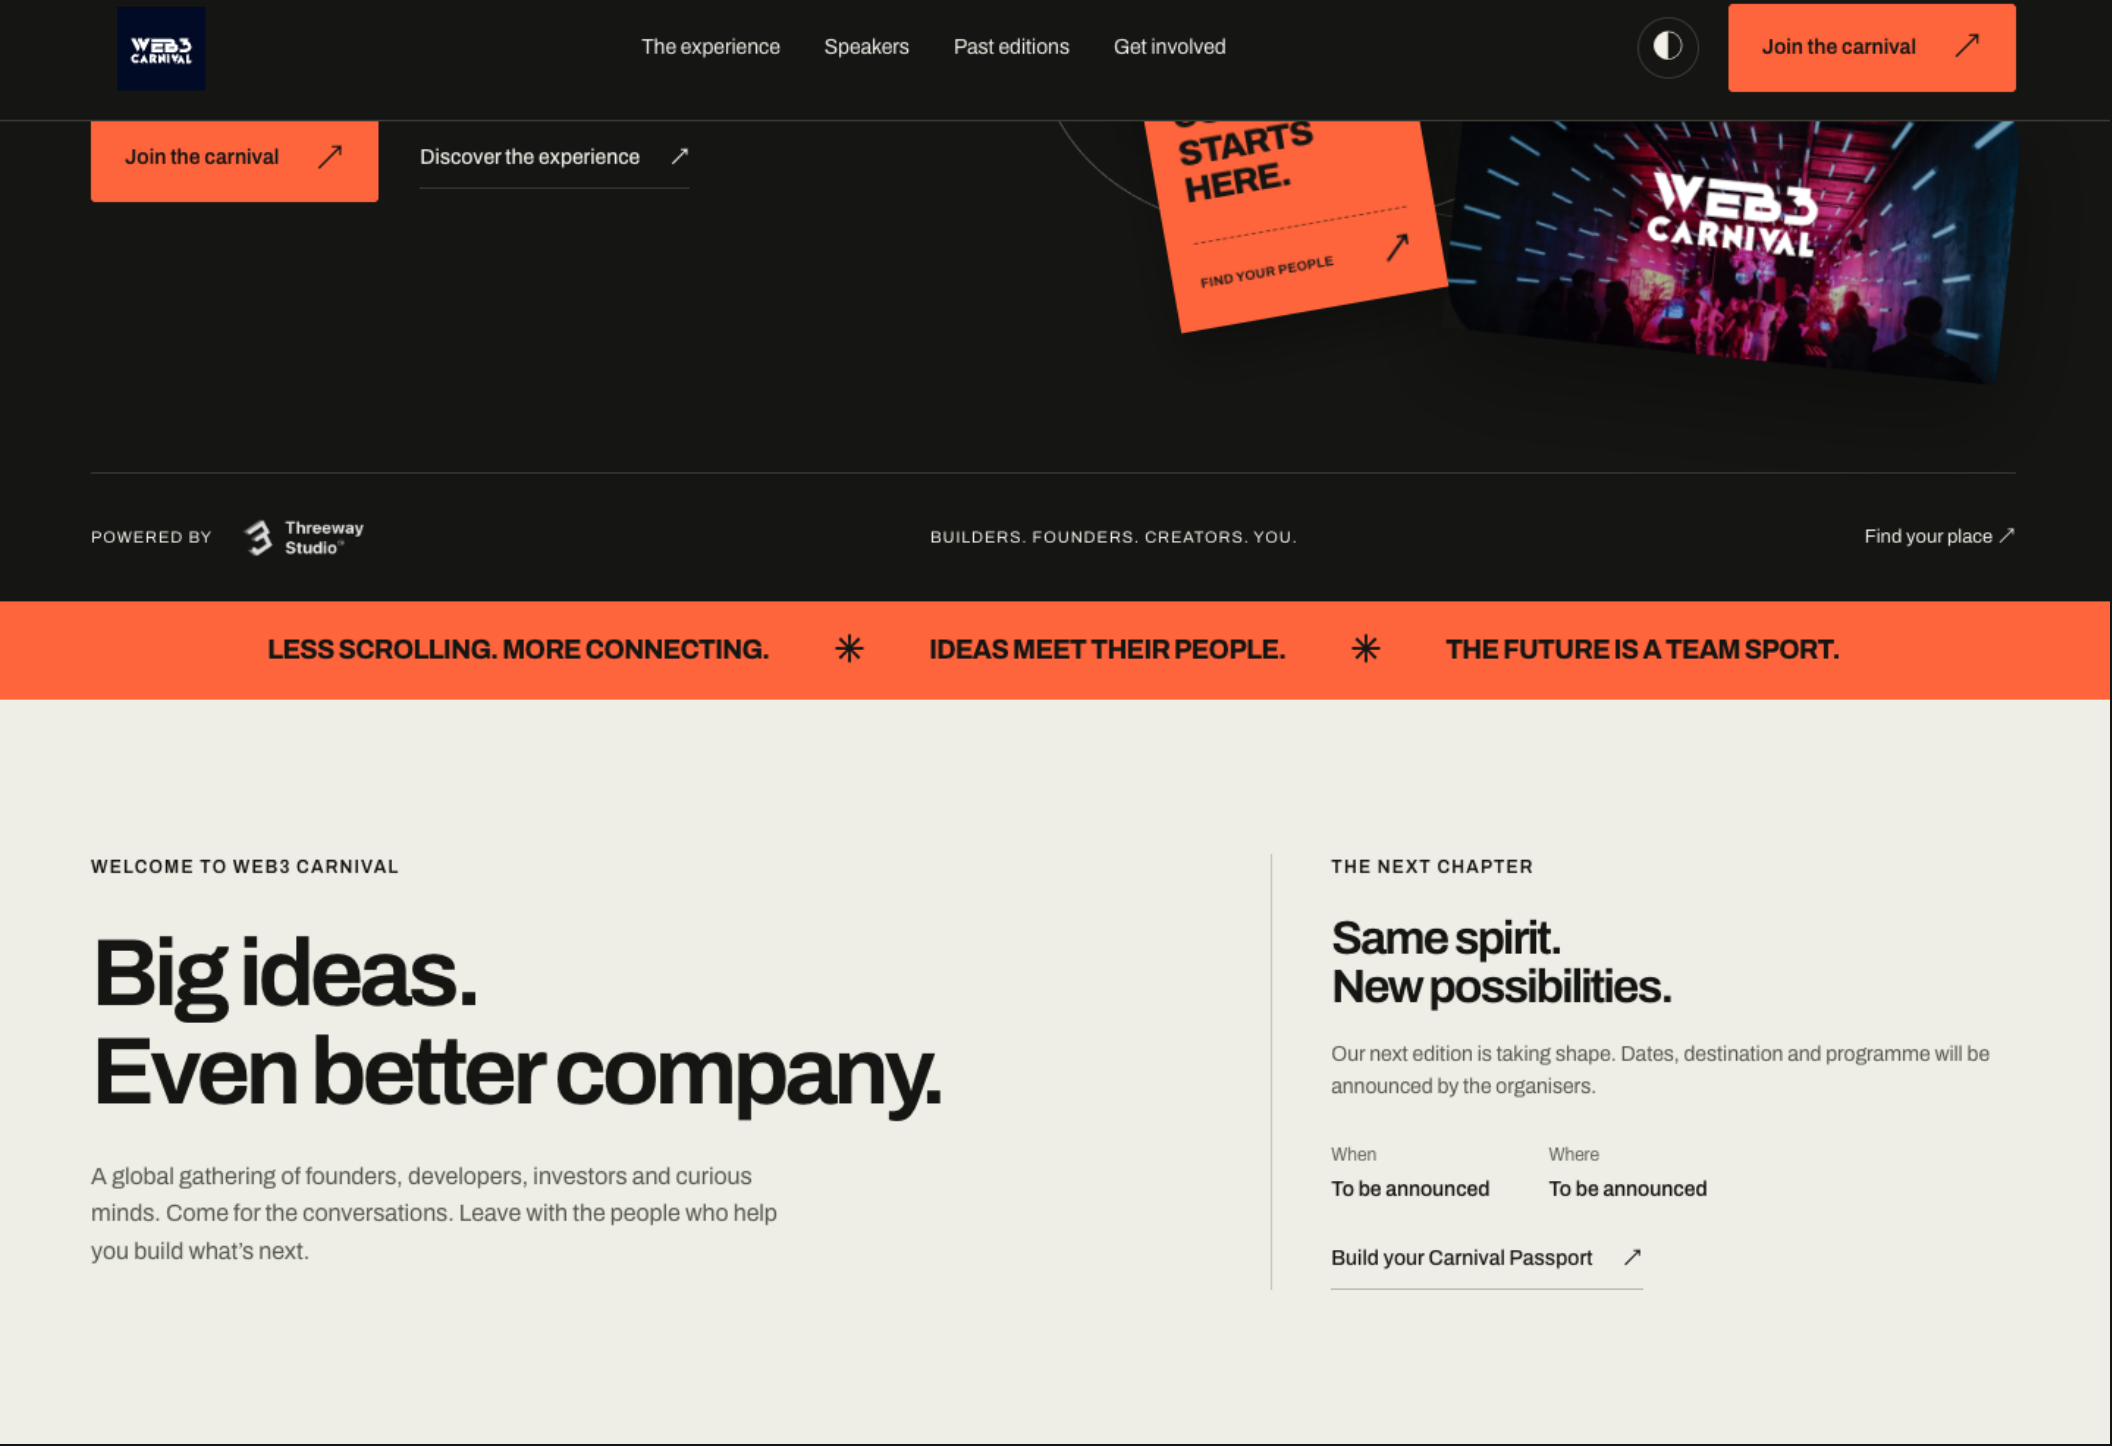

ACT

What do I do next?

A three-step registration preview, a downloadable plan and an organiser enquiry.

The next edition, without the guesswork.

Historical dates stay in the archive. A future event is never presented as confirmed when it is not.

CLEAR EVENT INFORMATION

The next chapter is explicitly marked to be announced, with no fabricated date, venue, ticket price or capacity.

CREDIBLE SOCIAL PROOF

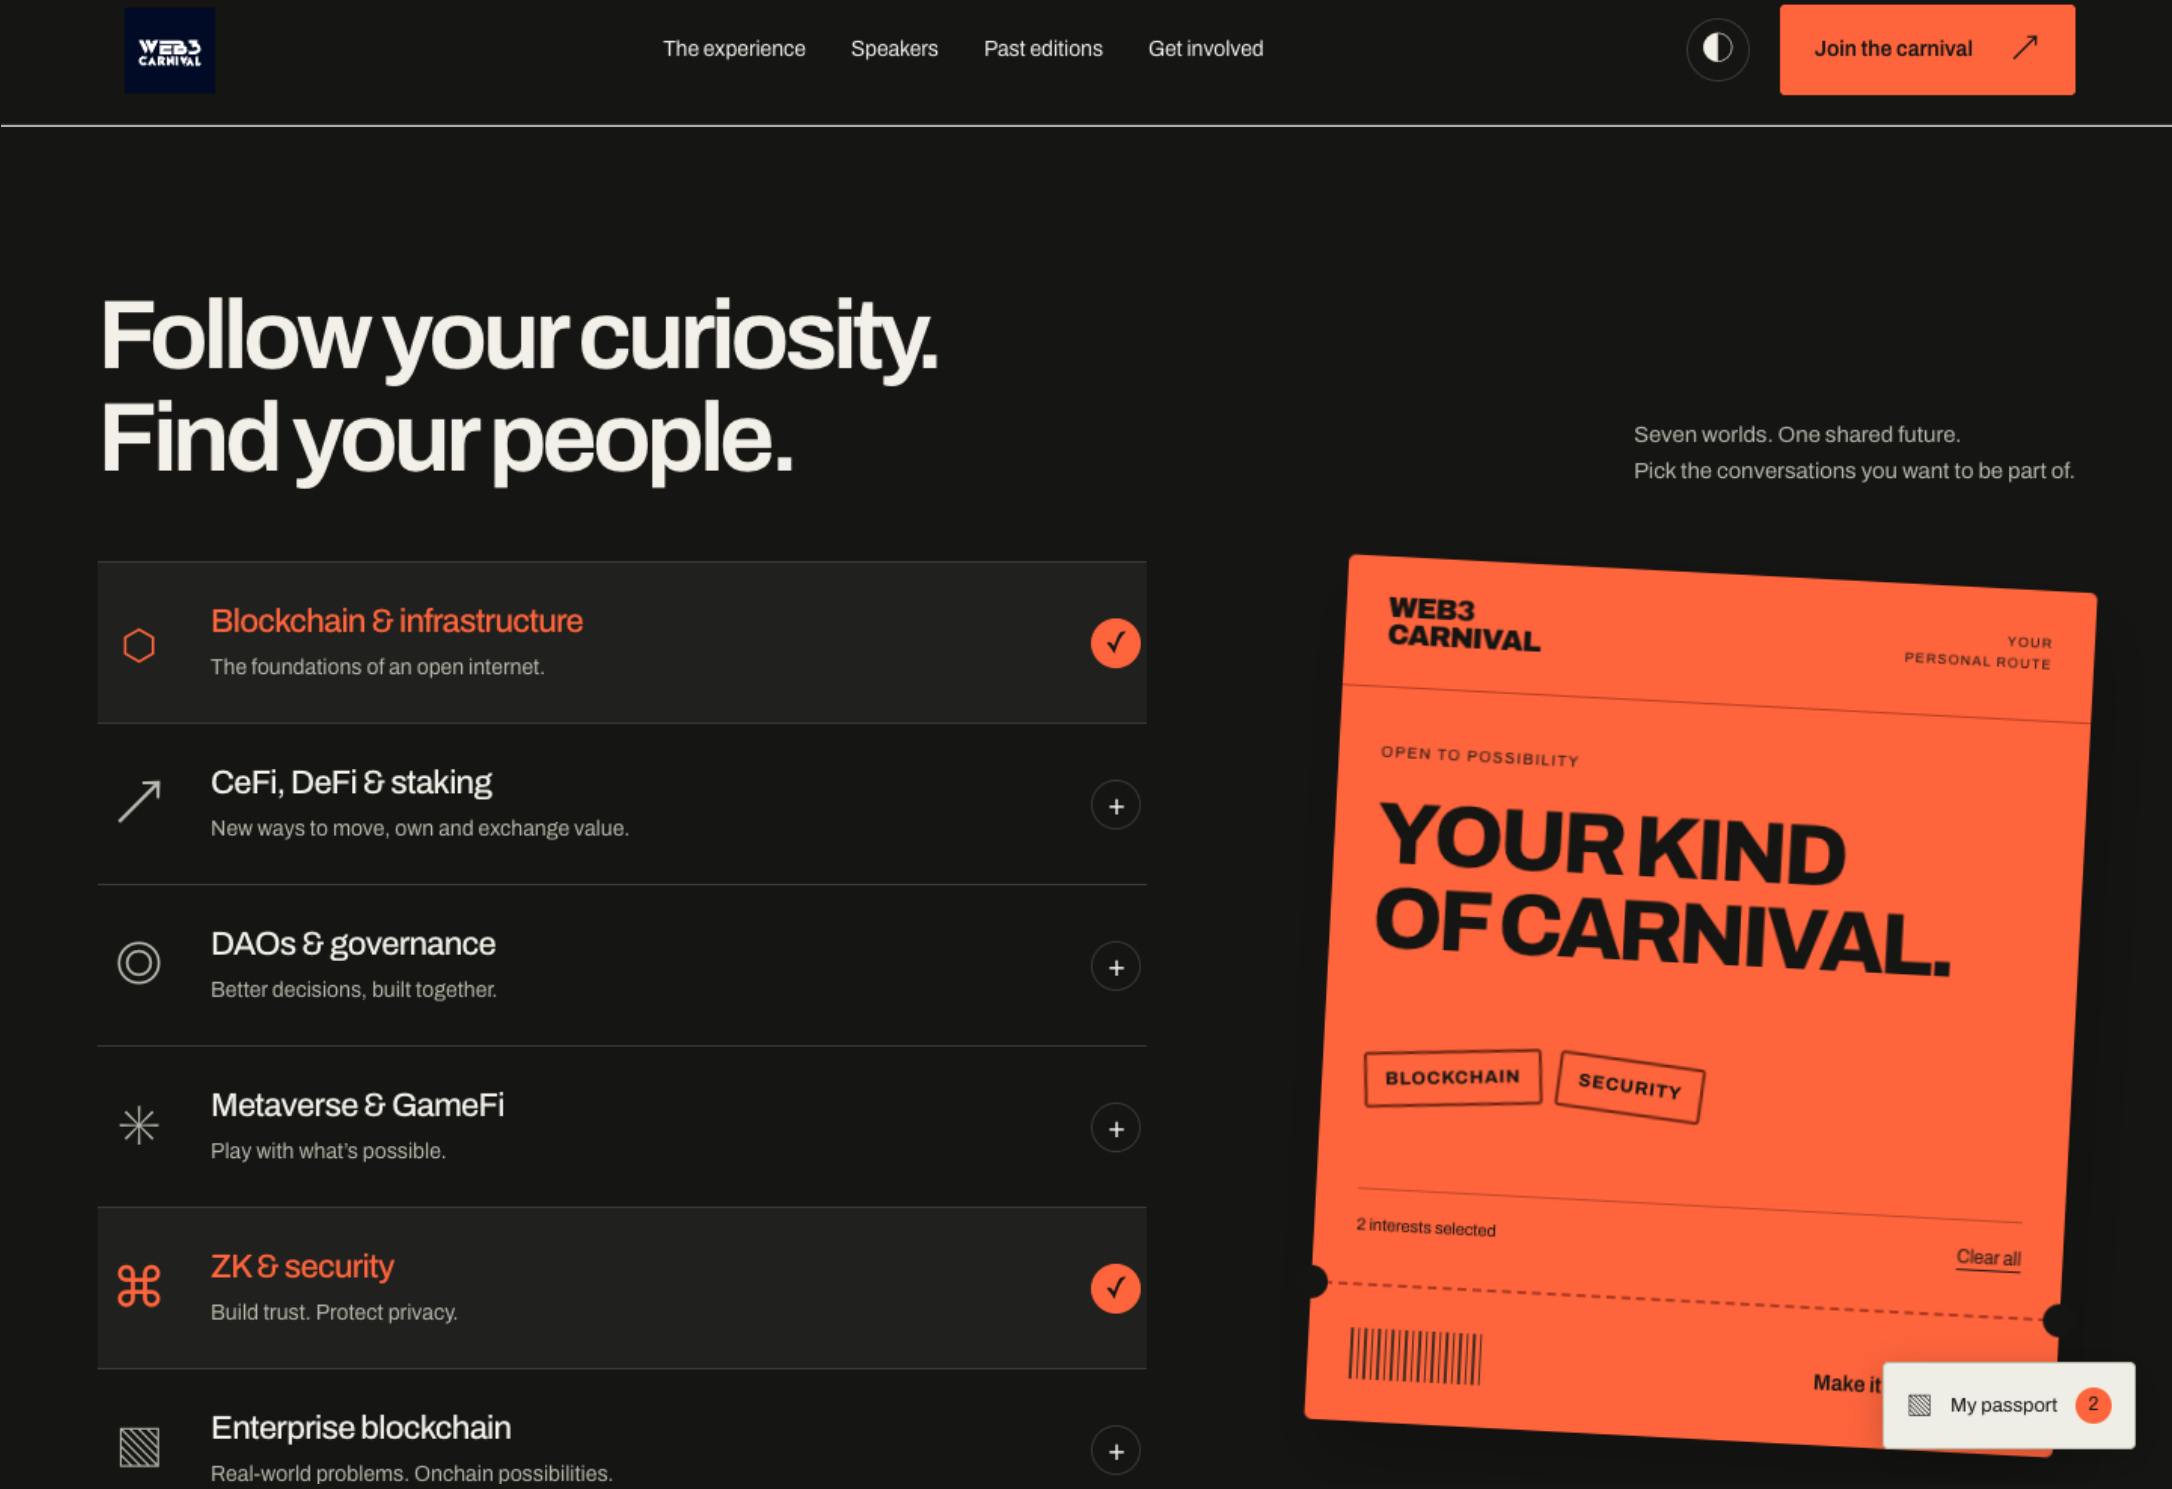

The community figures come from the current official website and link to that source. They are not a forecast for the next event.

A DIRECT NEXT STEP

The visitor can begin a passport immediately, or use the real organiser contact paths.

Your interests become your invitation.

The signature interaction: track selections visibly stamp a personal Carnival Passport.

SEVEN REAL TRACKS

Blockchain, DeFi, DAOs, GameFi, ZK/security, enterprise blockchain and NFTs retain the original event’s thematic breadth.

STATE THAT MATTERS

Selections stay in the browser and carry into the registration preview and downloadable plan. Clear them with one control.

BUILT FOR ACCESS

The same choices work by pointer, touch or keyboard. Reduced motion keeps the complete meaning and available controls.

Real people. Real reasons to connect.

Historical speaker profiles preserve names, portraits and source-listed affiliations.

FROM OUR PAST STAGES

Good company.
Great conversations.

Meet some of the minds who have joined the conversation. Different perspectives. Shared possibility.

Find a speaker or organisation 

INDIA

Raj Kapoor

Founder, India Blockchain Alliance

DUBAI

Nadja Bester

Co-founder, AdLunam

DUBAI, UAE

Ajeet Khurana

Angel investor; former CEO, Zebpay

SINGAPORE

Astha Yadav

Senior Blockchain Developer, OCBC Bank

Roles and affiliations as listed for past editions.

Explore more speakers +

EXPLORE THE ROSTER

Search names, organisations or topics. Expand the directory, open a profile and follow its original professional link.

A HUMAN VISUAL LANGUAGE

Large portraits replace a wall of small logos. Colour returns on hover, while the information remains visible without hovering.

HONEST CONTEXT

Every profile is labelled as historical. Past affiliations are not presented as current employment or a future speaker commitment.

INDEPENDENT DESIGN CONCEPT / CONTENT BASELINE: WEB3CARNIVAL.WORLD

05

A growing story, across borders.

The archive turns a list of old links into a useful event discovery experience.

ACROSS INDIA

22 MAY 2025

Bitcoin Pizza Day

A slice of culture. A shared love for Bitcoin.

DELHI, INDIA

05 APR 2025

Founders & Funders

The next big idea meets its next believer.

SINGAPORE

16 SEP 2024

DeGen Summit

Builders and bold ideas, at HUONE Singapore.

Historical events. Visit an edition for its original details.

FILTER BY PLACE

India, Singapore and Dubai filters immediately update the visible editions. Native horizontal scrolling works on touch and keyboard.

ORIGINAL EVENT ARTWORK

Bitcoin Pizza Day, Founders & Funders, DeGen Summit and World Web3 Consortium use the source website's own artwork.

CLEAR HISTORICAL STATUS

Dates are shown on every edition, with links to original listings. No old event is advertised as upcoming.

From the crowd to your community.

Photography provides the emotional context; useful routes help visitors find their place.

THE BEST PART IS THE PEOPLE

Some connections change everything.

A chance introduction. A shared idea. A conversation that becomes a collaboration. Make room for the unexpected.

Find your community ↗

MORE THAN THE STAGE

The natural-flow photographic reveal introduces the social side of the experience, with imagery reused from the brand website.

AN ECOSYSTEM, NOT A LOGO WALL

Past supporter names and the organiser mark provide concise proof. The partnership CTA leads to the organiser’s booking page.

BRAND + NEW DIRECTION

The existing event mark, source content and Threeway Studio relationship remain. Orange is a proposed redesign accent, replacing the original purple-led treatment.

Good things happen when we build together.

Some of the organisations that have supported past editions of Web3 Carnival.

PAST SPONSORS & ECOSYSTEM PARTNERS

Become a partner ↗

Everyone has a way in.

Involvement is designed around people’s intentions, not a long undifferentiated application list.

There’s a place for your kind of curious.

For the builders

For the founders

For the investors

For the curious

Find your next “what if” people.

Meet fellow developers, explore infrastructure and security, and connect with people turning ambitious ideas into working products.

Add the builder route +

First time in Web3 or building your next venture?
You’re in the right company.

Tell the story

Media enquiries ↗

A few things worth knowing.

Do I need to know about Web3?

When and where is the next edition?

Is my Carnival Passport a ticket?

How can I speak, sponsor or volunteer?

CHOOSE YOUR PERSPECTIVE

Builder, founder, investor and explorer tabs change the supporting content and recommended tracks.

CARRY THE ROUTE FORWARD

One action adds the suggested tracks to the passport. Your earlier interests remain selected.

REAL CONTACT PATHS

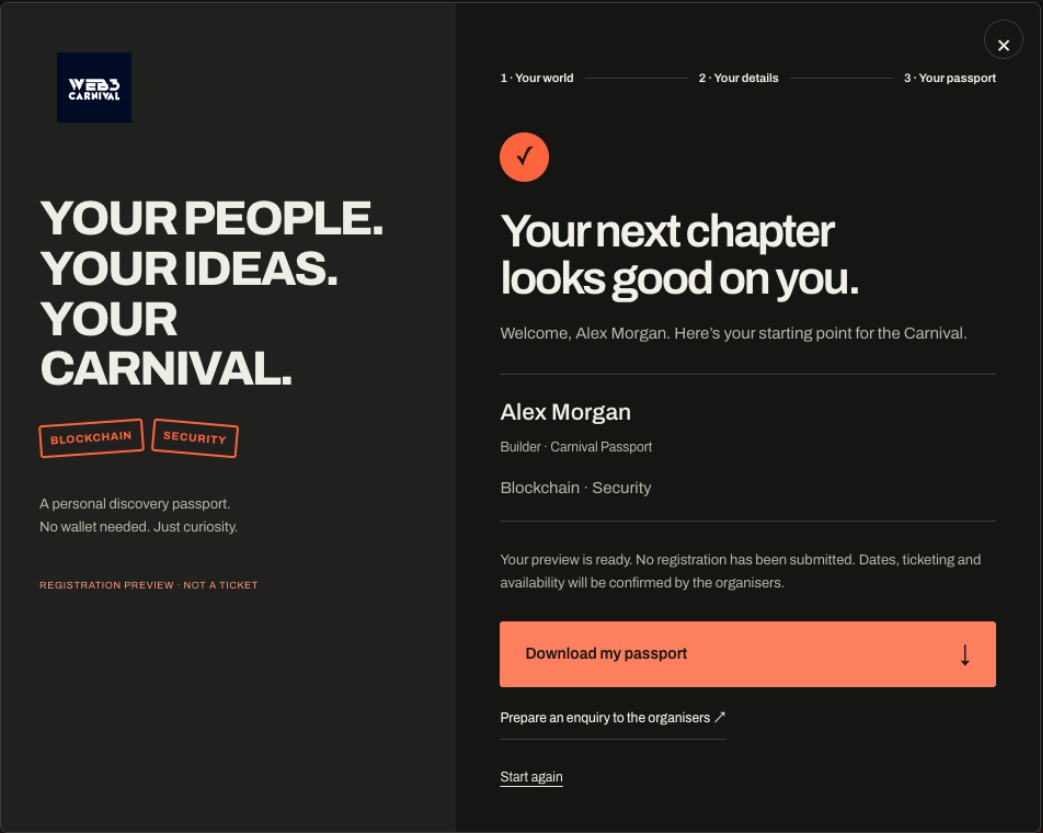

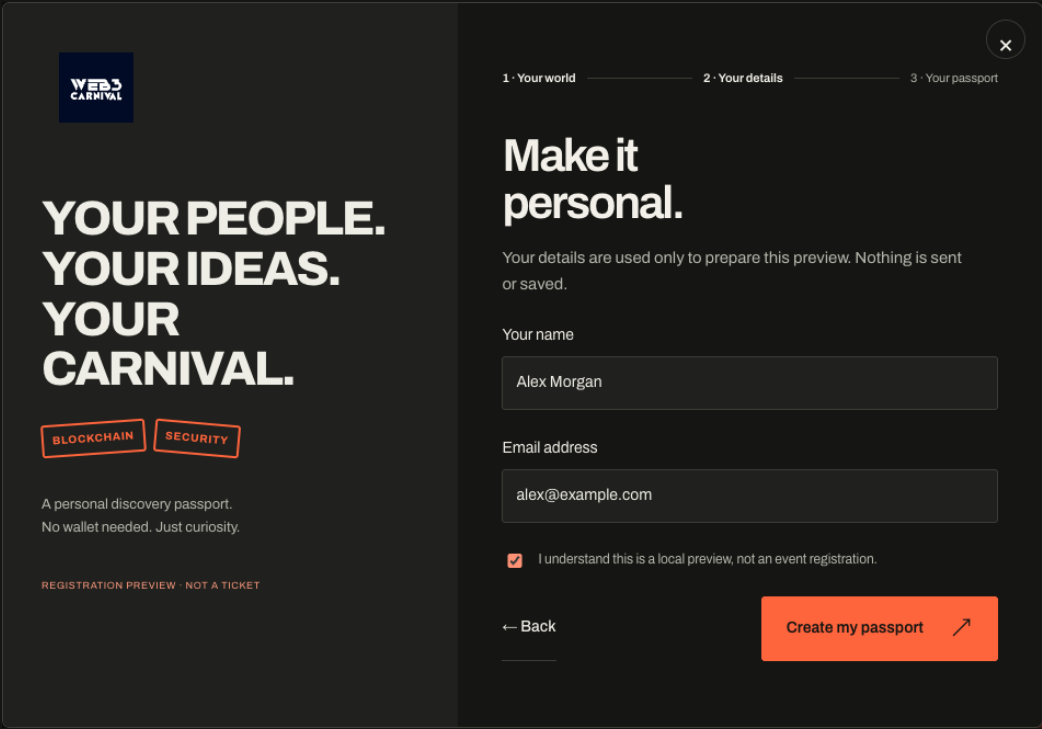

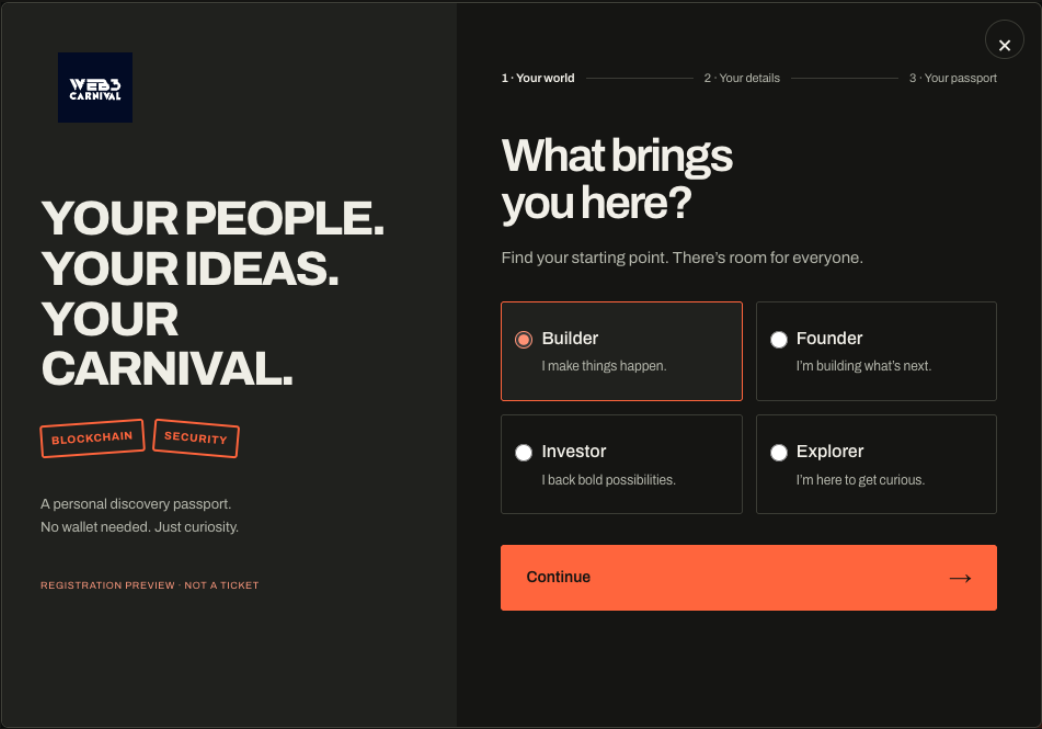

Speaker, community, volunteer and media links prepare an email enquiry for the visitor to review and send.

QUESTIONS ANSWERED

FAQs explain experience level, next-edition status, passport limitations and how to get involved.

A registration flow that feels like an invitation.

The working prototype moves from intent to details to a personalised outcome. It never claims a booking was made.

01 FIND YOUR STARTING POINT

Choose a role. Selected interests carry forward from the website.

02 MAKE IT PERSONAL

Name, email and a clear prototype acknowledgement. Required-field and email validation.

03 TAKE YOUR PASSPORT

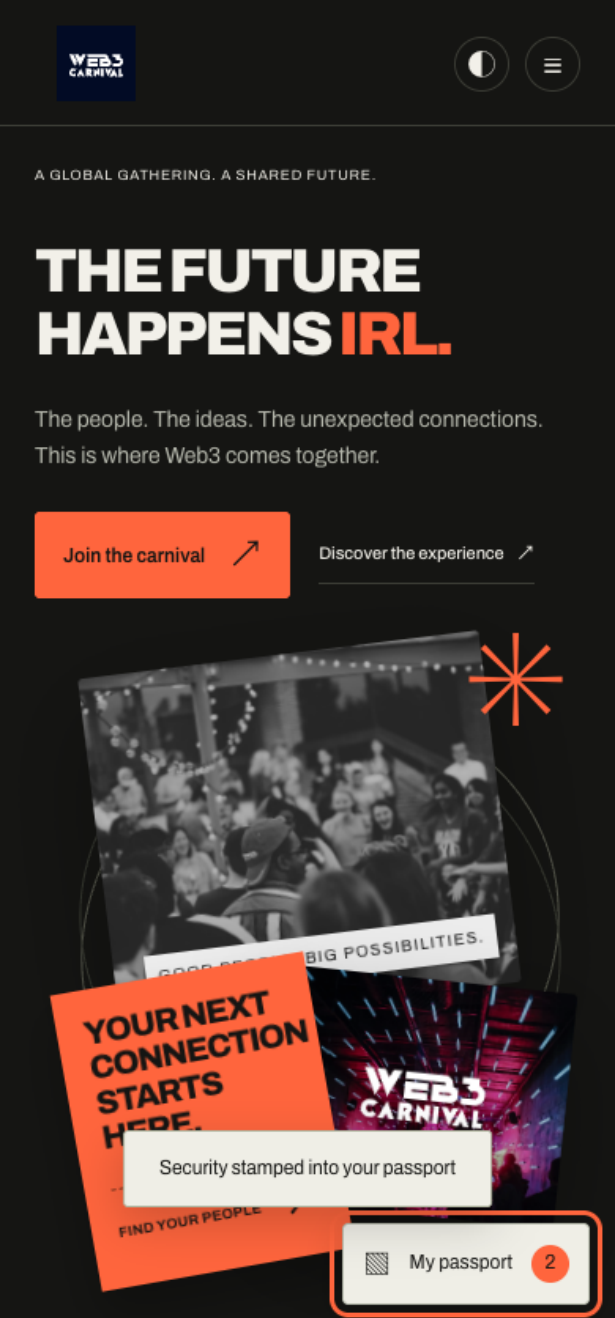

Download a personal plan or prepare an organiser enquiry in your own mail app.

Privacy by design: name and email are not stored or transmitted. Closing the preview clears them. Only interests and theme are browser preferences. No wallet connection, payment, booking or blockchain transaction occurs.

Designed for the screen in your hand.

Separate mobile composition, touch-sized track rows, a native event rail and a compact registration flow.

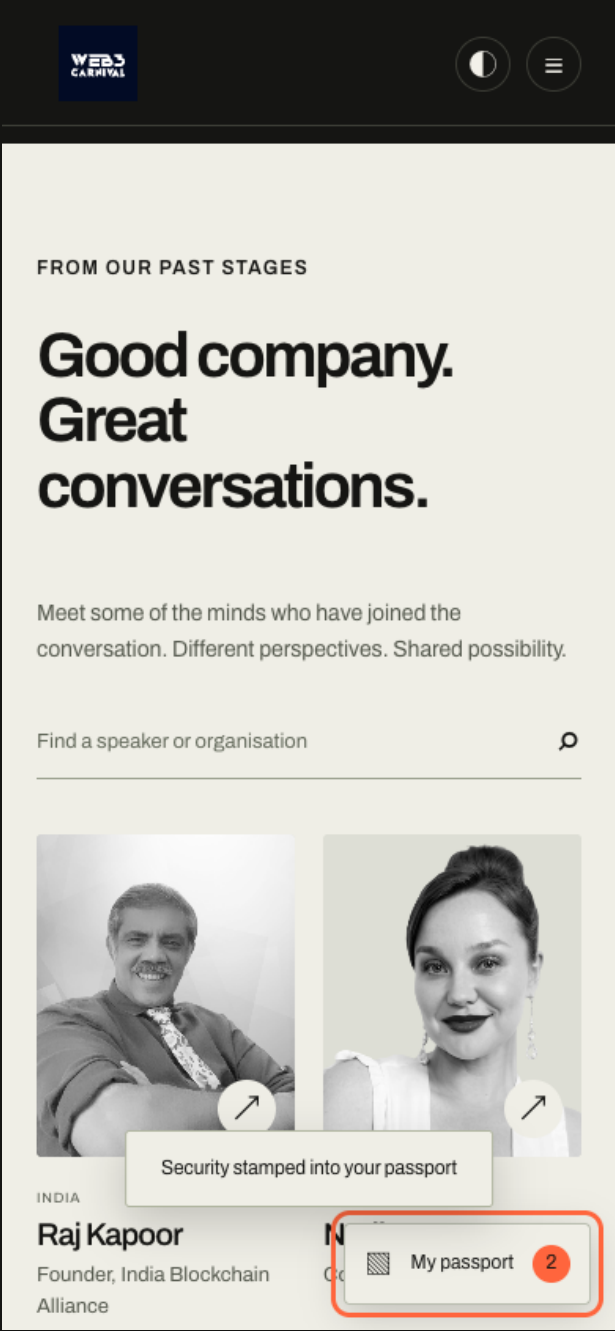

ARRIVE

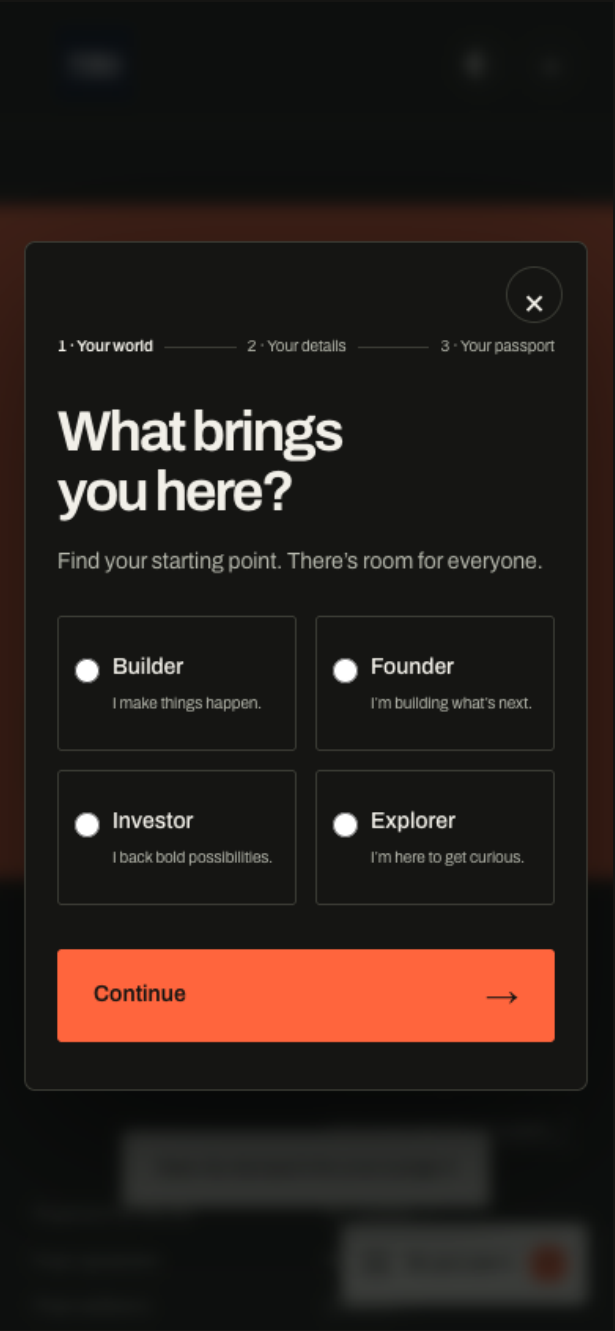

PERSONALISE

DISCOVER

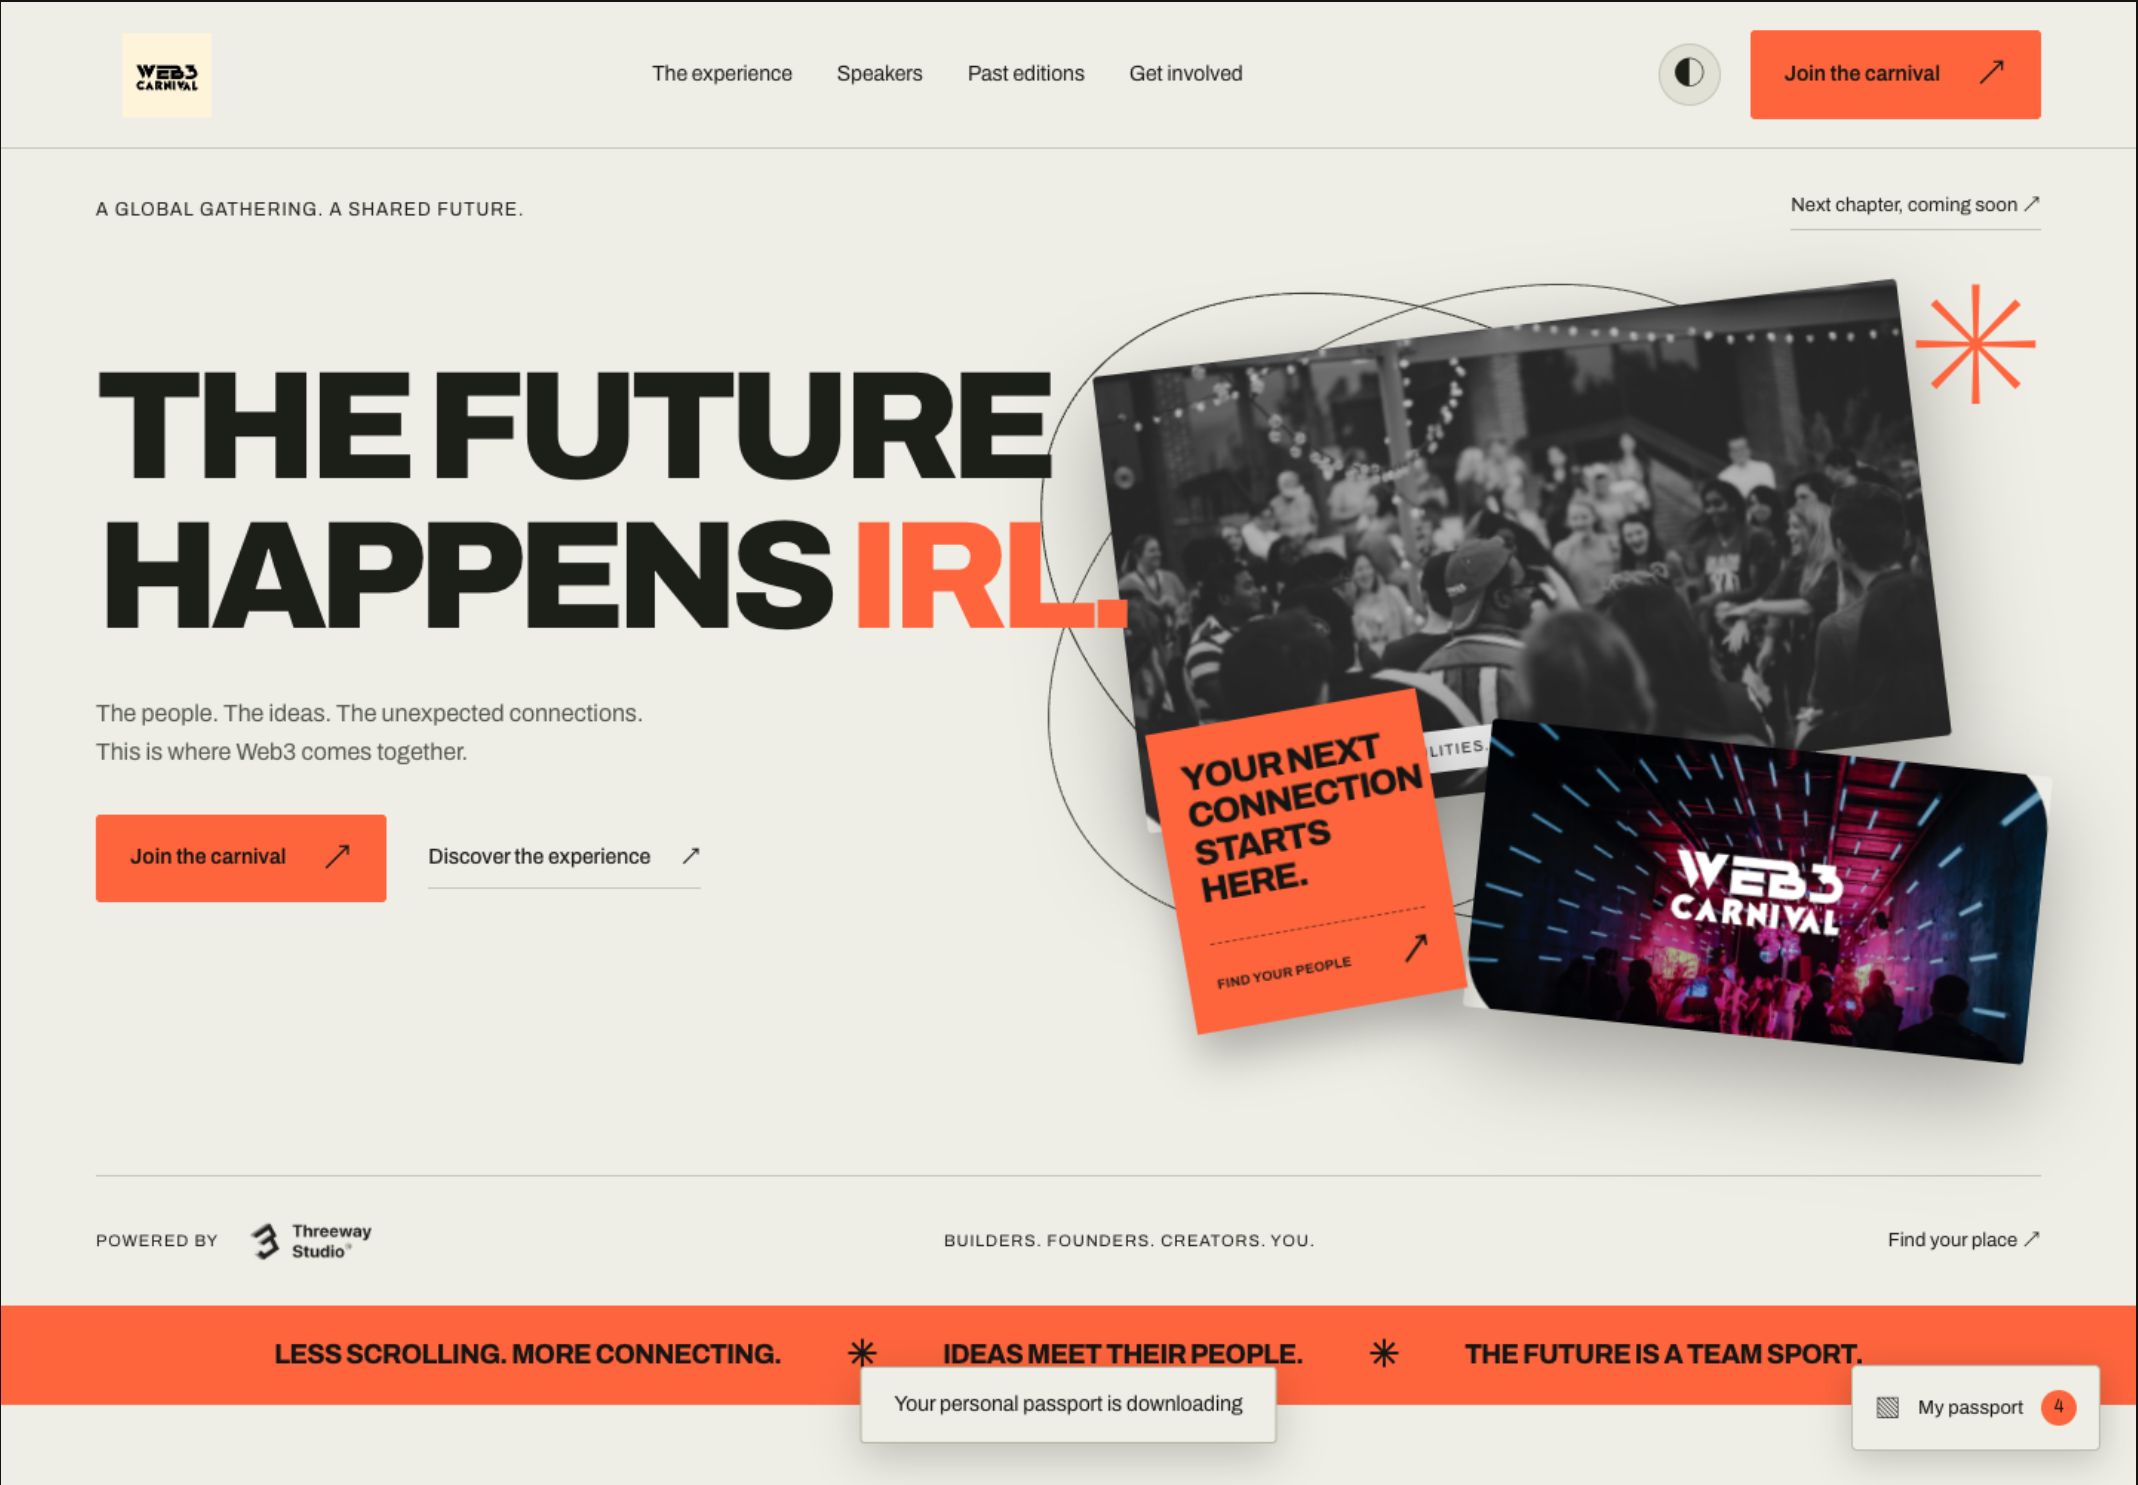

TAKE ACTION

Motion with a purpose.

Four distinct device families support the journey. Scrolling remains native throughout.

DEPTH, NOT DISTRACTION

Independent photo parallax and restrained pointer movement establish the opening. Counters, a photographic reveal and staggered portraits vary the pacing.

THE PEAK

Curiosity becomes agency when interests accumulate as passport stamps. The tracks have the largest content span; the ending resolves with a stable invitation.

TWO COHERENT THEMES

Light/dark switching retains the same hierarchy and orange accent. Theme preference is local to the browser.

REDUCED MOTION

Motion preferences remove positional animation while preserving text, images, choices, navigation and registration.

Complete journey. Clear handoff.

A functional design prototype, checked across desktop, tablet and phone layouts.

COVERAGE

Homepage; next-event information; all seven tracks; past speakers; editions; attendee routes; partners; registration; contact; social footer.

INTERACTIONS

Track selection and persistence, speaker search and profiles, event filtering and rail navigation, keyboard role tabs, registration validation and passport download.

VISUAL VERIFICATION

167 Scroll Craft samples across desktop, mobile and reduced motion. Additional 360px, 390px, 768px and 1440px layout checks, interaction screenshots and image loading checks.

WHAT IS READY

The complete static website runs locally and can be hosted from its dist folder. This PDF demonstrates the desktop/mobile journey, including the registration flow.

WHAT STILL NEEDS THE ORGANISER

Confirmed future event details; production registration, ticketing and email delivery; approval for public use of brand assets. The current build is a clearly labelled independent concept.

LIMITS OF TESTING

Browser-emulated phone views were tested, not physical iPhone/Android hardware. No live registration was submitted and no public deployment is claimed.
